

Introducing a New Generation Of **nano** Spray Lubricants

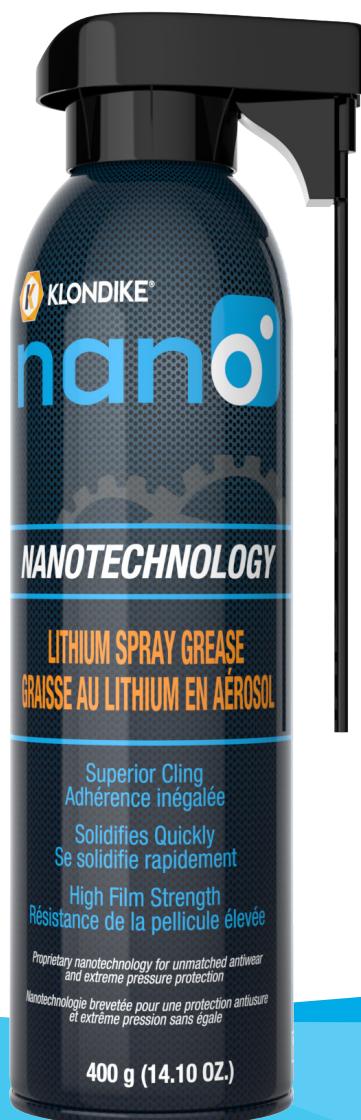

KLONDIKE nano Spray Grease and KLONDIKE nano Chain & Cable Lubricant are new cutting-edge formulations incorporating proprietary nanotechnology for unmatched antiwear and extreme pressure protection.

ENGINEERED
WITH **NANOTECHNOLOGY**

KLONDIKE nano Spray Grease

- ✓ Superior Cling
- ✓ Solidifies Quickly
- ✓ High Film Strength

AEROSOL
KL-CH4130

KLONDIKE nano Chain & Cable Lubricant

- ✓ Superior Cling
- ✓ Outstanding Friction Reduction
- ✓ Rust & Corrosion Resistant

AEROSOL
KL-CH4230

KLONDIKE nano Spray Grease

KLONDIKE nano Spray Grease is the ultimate specialty grease product which incorporates proprietary nano additive technology.

1. Advanced light viscosity base applies as a liquid coating and quickly cures into a tough grease layer.
2. Cured grease clings and stays where it is sprayed even on vertical surfaces.
3. Metals surfaces are protected from rust and corrosion.

Perfect for various metal parts, including:

- Threaded fittings
- Hinges
- Bearings
- Bushings
- Chain drives

KLONDIKE nano Chain & Cable Lubricant

KLONDIKE nano Chain and Cable Lubricant is a high-performance product featuring proprietary nano additive technology.

1. Special formulation penetrates deep into wire rope strands and chain mechanisms, improving tensile strength and reducing stretching.
2. Suppresses noise, stays in place, and forms a tough protective coating.
3. Repels water, protecting metal parts from rust, corrosion, and wear.

Professional lubricant designed for use on:

- Chains
- Wire ropes
- Cables

Proprietary nanotechnology utilizes uniquely designed nano-sized additive components that deliver unmatched antiwear and extreme pressure protection.
